### Foam Blowing Agent

### A Unique, Sustainable Foam Blowing Agent for Polyurethane Foam

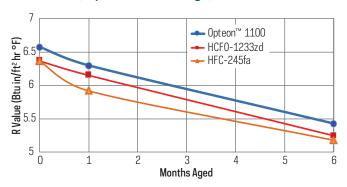

Formacel™ 1100 from DuPont is now Opteon™ 1100 from Chemours, a new, 4th generation foam blowing agent offering both improved insulation performance and an excellent environmental profile.

 The only foam blowing agent providing excellent environmental properties (ODP=0, GWP=2) while maintaining the most desirable characteristics of HCFC-141b

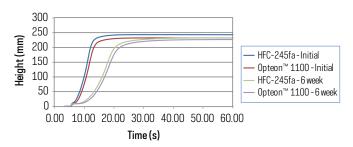

- Boiling point >25 °C (77 °F)
- Low vapor thermal conductivity
- Nonflammable
- Non-VOC
- The unique molecular structure of Opteon™ 1100 imparts superior chemical stability
  - Superior B-side shelf life stability compared to HCFOs
  - Compatible with amine catalysts no stabilizers required
  - Improved R-value performance is attainable when compared to HFC-245fa, HFC-365mfc, pentanes and HCFOs
- A sustainable foam blowing agent for polyurethanes in a wide range of applications, including apparel, appliance, automotive, construction, electronics, furnishings, marine, medical, and packaging.

#### Commercialization

Opteon™ 1100 is SNAP-approved for high pressure, two-component SPF applications. Semi-commercial quantities are available for scale-up and demonstration projects. A world class production facility is currently under construction with completion and product availability expected starting in second half 2017.
